EXPERIENCE

Technimus Pvt Ltd.

Apr. 2024 – Present

Software Engineer

Lewes, Delaware

- Developed and maintained **multi-tenant** application for 200+ tenants, **scaling the platform** to serve over 5M+ monthly requests while ensuring accessibility and compliance with REST and W3C standards.
- **Optimized database schema and queries in multi-schema PostgreSQL databases**, enhancing scalability and reducing query times by 20%, ensuring high availability and data isolation.
- Replaced per-request inserts on the activity log with an in-memory write-behind queue (5,000-entry buffer, 50-row flushes every 5s), cutting database round-trips **~50x**.
- **Attended regular meetings** with team members and clients to track progress, resolve issues, and ensure feature delivery in alignment with client goals, contributing to a 10% improvement in delivery timelines.

Southern Illinois University Edwardsville

May. 2025 – May 2026

Teaching Assistant

Edwardsville, Illinois

- Debugged and reviewed **300+ Python and Java assignments** per semester, identifying logic errors and giving targeted feedback that improved resubmission pass rates by 20%.
- Reviewed and graded student-designed ER diagrams, **coaching 120+ students** on applying database normalization (up to 3NF) to fix schema design flaws before implementation.
- Held office hours supporting students in **Excel-based data analysis and visualization**, translating raw datasets into statistical summaries for course capstone projects.

Tech Central Pvt. Ltd.

Kathmandu, Nepal

Frontend Engineer

Oct. 2023 – Apr. 2024

- Ensured **web performance and accessibility** by incorporating Lighthouse metrics into development practices, consistently achieving high scores across all projects.
- Utilized **CSS preprocessors (SASS)** with **BEM patterns** to efficiently style the web application using mobile first style, resulting in a consistent and visually appealing user interface.
- Streamlined front-end workflows using Gulp to **automate repetitive tasks** such as minification and compilation; saved an average of 5 hours weekly on manual processes, allowing focus on feature development.

PROJECTS

OSOM: Overseas Student Operation Management | React, Typescript, Express

- Developed comprehensive **CRM** for education consultancies, featuring student management, task tracking, and visa scheduling, serving **100+ consultancies** in Nepal, processing **900,000+ monthly network requests**.
- Integrated student portal featuring document management, visa tracking, and course enrollment systems, while implementing an intuitive, **feedback-driven** dashboard for **real-time progress monitoring**.

HEX 2023 Website (Event, Hackathon & CTF) | Astro, Docker, AWS

- Volunteered in **designing and developing** websites for HEX Himalaya, including hackathon, events list, and CTF sites (also member of the CTF organization team) organized by Himalaya College of Engineering.
- Optimized website to score **100% in Lighthouse in all factors** and implemented strategic keywords for top-notch search engine rankings handling over **25,000 requests in 36 hrs.** timespan.

DelliDrop: Grocery Delivery Admin Platform | *React, TypeScript, Firebase, OSRM, Leaflet*

- Built a time-series forecasting model to predict short-term grocery price trends, driving pre-purchase decisions that **increased profit margins by 30%**.
- Shipped route optimization on the OSRM Trip API with a Haversine nearest-neighbor fallback; dispatchers kept ordered stop sequences for **300+** customers even when the routing service went down.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, SQL, Java, Go, HTML/CSS
Web Development: React.js, TypeScript, GraphQL, Node.js, Express.js, Next.js, Zustand, TRPC, Tailwind CSS,
Database & Streams: PostgreSQL, Firebase, Redis, MySQL, Drizzle, Kysely, Socket.IO
Data Science: Sci-kit Learn, Weka, NumPy, Pandas, PyTorch, Observable, D3.js
Productivity Boost: Vite, Git, VS Code, Vim (Basics), Bash, AWS, Docker, Microsoft Office Suite
Cloud & DevOps: AWS (S3), Cloudflare Workers, DigitalOcean, Docker, GitHub Actions, CI/CD, Git
Security & Practices: JWT / RBAC, AES-256, Rate limiting, Agile, Pino/Axiom observability
AI Integration: Gemini API, Natural-language-to-SQL, MCP Servers, Streaming LLM UIs
Relevant Courses: Artificial Intelligence, Big Data Analytics, Linear Algebra, Probability & Stats, Machine Learning, etc.

RESEARCH PUBLICATION

Sah Rohit., I Crk. **Assessing Data-Driven Performance Decline on LLM Fine-tuning.** PrePrint 2026.
Sah R., Amrutha G., Manasa, Chapagain B., & Padmavathi A. **Performance Evaluation of Movie-Based Recommendation Systems using Hybrid Machine Learning Models.** International Conference on IoT Based Control Networks and Intelligent Systems ICICNIS 2023.

EDUCATION

Southern Illinois University, Edwardsville, IL <i>Master of Science in Computer Science (Teaching Assistant)</i>	CGPA: 3.893/4.0 Aug 2024 — May 2026
Università degli Studi di Milano Statale, Milan, Italy <i>Foreign Student Exchange Program</i>	Marks: 27/30 Feb. 2023 — Jul. 2023
Amrita School of Engineering, Chennai, India <i>Bachelor of Technology Computer Science and Engineering (Complex Scholarship)</i>	CGPA: 8.66/10 Aug. 2019 — Jul. 2023

OTHER DETAILS

Additional Activity: Mentor for Cognizance (College Club) for 2 years — Live-in-Labs (Research for development & sustainable solutions) — Mentor and Core Organization Team for Hex Himalaya Website, Hackathon, CTF, etc. — Volunteered in Traffic Policing — Bungee jumped from the world's 2nd highest platform.
